Portuguese

Salvado, *António Manuel* was born in 1960, Lisbon. He finished the Military Academy in 1981 and the Computer and Systems Engineering degree at the Technical University of Lisbon (IST) in 1988.

As a Computer Science Engineer, he is certified in "System Analysis" by the *National Centre for Information Technology*, UK, in "Real-time Programming" by *ADP Training Centre*, UK and in "Information Security" by *NATO CIS School*. He is additionally specialized in Systems Programming, Project Management and Organizational Performance Management.

Throughout a brilliant career, he first served in the Signals School and in the Signals Regiment, where he joined the team that installed the first packet switching system in the Army. Since then and until 2000, he was mainframe administrator and Data Center director. Furthermore he has been involved in several Portuguese Army Communication and Information Systems programs.

Meanwhile Colonel Salvado taught computer programming, telecommunications systems, project management and graphic computing and at the Military Academy and at Lisbon's Polytechnic University.

Since 2000 he was appointed as executive officer (XO) in Signals Regiment and director in the Army Information Systems Department. and director of Information Systems Division in MoD.

He was Director of Information Systems at the Ministry of Defense where he led the implementation of the Integrated Management System adopted by the entire Defense staff, since 2006. Moreover, he collaborated with Defense Interest Group (DEIG) in the requirements for SAP Defense Forces and Public Security tool.

Colonel Salvado is presently Vice-president of the Portugal Chapter, since 2014. He has been an active member of the Chapter and he assumed board responsibilities and the coordination of technical meetings, such as "*The Soldier of the Future: The Integration in the Internet of Things (IOT)*", "*Digital Transformation and Emerging Technologies: implications for the planning and conduct of military operations*", "*Intelligent Cities and Cyber Resilience*", "*Cybersecurity Forum*".

He is awarded with seven medals for Distinguished Service, Military Merit, D. Afonso Henriques and Exemplary Behavior. In recognition of his dedication to the chapter and the association he was awarded in 2019 with the "AFCEA International Medal of Merit ".
